

Course Overview

Advance your practice of buttock implants by obtaining specialized training in the techniques used to perform the procedure by those who have a great amount of knowledge and experience doing it. The first part of the workshop you will learn the full view of the buttock surgery. The second part you will observe a live procedure performed by the Masters. You will experience up-close and personally how the techniques are done. The third part you will follow up with a debriefing and the ability to ask thorough questions. At the end, you will learn to improve the results of your buttock surgery.
